

As long as the service lines are available, one may tap into the water and/or sewer system. To find out if water or sewer lines are available, please contact Kevin Farrell, Water/Sewer Superintendent. Once it is determined services are available, the future user must sign a pre-annexation agreement if property is not already within the Milan village limits. For water-only and water/sewer accounts, a meter must be purchased for \$225. The meter is optional for sewer-only accounts, but is advised to be billed accordingly for sewer discharge. Water and sewer tap fees are \$550 each. Therefore, in order to connect a residence to the Milan water and sewer lines, the total fees are \$1,325.
